

logarithmic U -sensitivity

$$U = (P \times D)^{0,5}$$

$$\ln U = (\ln P + \ln D) / 2$$

$$\log [U, P, D]$$

$$\ln P = [c \cdot \lambda - c \cdot 570]^2_2$$

$$\ln D = [c \cdot \lambda - c \cdot 545]^2_2$$

adaptation: $u = 0$
