

„achromatic signal”-description functions $Q_{lm}[\mathbf{k}(x-u)]$

with $x = \log L$ (L = luminance)
 $u = \log L_u$ (L_u = surround luminan.)

$$Q_{lm}[\mathbf{k}(x-u)] = \frac{l}{\ln \sqrt{2}} \ln q[\mathbf{k}(x-u)] - m$$

function values with $l = m = 1$:

$$Q[\mathbf{k}(x-u) \rightarrow +\infty] = 1$$

$$Q[\mathbf{k}(x-u) = 0] = 0$$

$$Q[\mathbf{k}(x-u) \rightarrow -\infty] = -1$$
