

logarithm. **JB**-Empfindlichkeit $\log U_a = \log U_o$

$$U_a = (P_a \cdot D_a)^{0,5}$$

$$\log P_a = \log P_o - 0.05$$

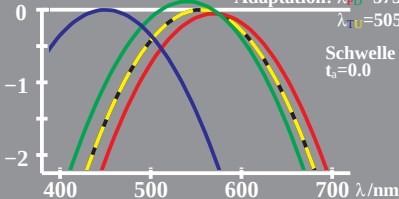

$$\log U_a = (\log P_a + \log D_a) / 2 \quad \log D_a = \log D_o + 0.12$$

$$\log [U_a, P_a, D_a, T_a] \quad \log T_a = \log T_o + 0.0$$

Adaptation: $\lambda_{PD}=575$

$\lambda_{TU}=505$

Schwelle
 $t_a=0.0$
