

logarithm. U_o -Empfindlichkeit $\log U_a = \log U_o$

$$U_o = (P_a \cdot D_a)^{0,5}$$

$$\log P_a = \log P_o - 0.05$$

$$\log U_o = (\log P_a + \log D_a) / 2 \quad \log D_a = \log D_o + 0.12$$

$$\log [U_o, P_a, D_a]$$

Adaptation: $\lambda_{RG}=575$
