Download of profiles for contrast steps similar to ISO 9241-306
The nine profiles can be downloaded separately or all together.
On a Mac the nine profiles must be copied into the folder:
Library/ColorSync/Profiles/Displays, and appear as display profiles.

http://farbe.li.tu-berlin.de/AEX0LCD_26icc
http://farbe.li.tu-berlin.de/AEX0LCD_XX.zip
For the copy of the 9 files the zip file must be unzipped.

Two profile examples created with Mac systems of 2010 and 2020:

AEX01-1N

Limitation profile applications with settransfer and goal
Any display output is intended for the application:

1. of the PS operator {0,5 exp} settransfer, see PG-eps file and <http://farbe.li.tu-berlin.de/AEX9/AEX90-1N.pdf>.
2. of the profile LCD_12 on the display output of the VG-PS file <http://farbe.li.tu-berlin.de/AEX8/AEX8-0A-PS.pdf>.
3. of the profile LCD_12 on the display output of the PG-pdf file <http://farbe.li.tu-berlin.de/AEX9/AEX90-8N.pdf>.

If the software works according to the programming language *Adobe PostScript*, then the ISO-contrast step Cyp1 shall appear as display output.

Disadvantage: Partly the hue steps change visually, for example for a yellow green hue the *rgb* colour values change with {0,5 exp} settransfer from (1,0,0) to (1,0,25,0).

3D-linearization in the Lab* instead in the *rgb* colour space reaches the goal to 100% instead of ca. 65% with *rgb*, see [Richter \(2016\)](#).

Goal: Adobe DistillerDirectory steers the 3D-Lab* linearization.

Gute Software zur Ausgabe für die Kontraststufe Cyp1
Für 15 ISO-Kontraststufen zwischen Cyp1 und Cyp15 in VG, siehe <http://farbe.li.tu-berlin.de/AGX8/AGX8L0NP.PDF>.

Der zugehörige Ordner enthält 16 Dateien in den Formaten PS, TXT und PDF in Vektorgrafik (VG), siehe <http://farbe.li.tu-berlin.de/AGX8/AGX8.HTM>
Im folgenden wird nur die ISO-Kontraststufe Cyp1 benutzt.
Die Displayausgabe der VG-PS-Datei für die Kontraststufe Cyp1 <http://farbe.li.tu-berlin.de/AGX9/AGX9-1A.PS.pdf> führt nicht zur erwarteten Ausgabe. Die ISO-Kontraststufe ist Cyp8.
Die Displayausgabe der VG-PDF-Datei für die Kontraststufe Cyp1 <http://farbe.li.tu-berlin.de/AGX9/AGX9-1A.PDF.pdf> führt zur erwarteten Ausgabe mit niedriger ISO-Kontraststufe Cyp1.
Anwendung der Software Mac Preview erzeugt eine falsche Ausgabe, falls die VG-PS-Datei den PS-Operator settransfer enthält.

AEX01-4N

Software Mac Preview zur Ausgabe für die Kontraststufe Cyp1
Für 15 ISO-Kontraststufen zwischen Cyp1 und Cyp15 in PG, siehe <http://farbe.li.tu-berlin.de/AGX9/AGX9L0NP.PDF>.

Der zugehörige Ordner enthält 16 Dateien in den Formaten eps, txt und pdf in Pixelgrafik (PG), siehe <http://farbe.li.tu-berlin.de/AGX8/AGX8.HTM>
Im folgenden wird nur die ISO-Kontraststufe Cyp1 benutzt.
Die Displayausgabe der PG-PS-Datei für die Kontraststufe Cyp1 <http://farbe.li.tu-berlin.de/AGX9/AGX9-1.N.eps> führt mit Win AdobeDistiller V3 und Mac GraphicConverter V5.2 zur erwarteten Ausgabe mit niedriger ISO-Kontraststufe Cyp1.
Die Displayausgabe der PG-PDF-Datei für die Kontraststufe Cyp1 <http://farbe.li.tu-berlin.de/AGX8/AGX8-1A.PDF.pdf> führt mit Win AdobeReader V3 und Mac GraphicConverter V5.2 zur erwarteten Ausgabe mit niedriger ISO-Kontraststufe Cyp1.
Anwendung der Software Mac Preview erzeugt eine falsche Ausgabe, falls die PG-PS-Datei den PS-Operator settransfer enthält.

AEX01-6N

Application limits of profiles and the PS operator settransfer
A profile LCD_12 changes a display output similar to a Gamma slider.
A Gamma slider was deleted in 2019 on the Mac operating system.
Nine profiles between LCD_10 and LCD_26 may be used instead.

The software Mac Preview V5.0 considers it the PS operator settransfer. VG and PG-PS-files lead to a wrong display output, if the PS operator /n exp settransfer is used with n different to 1,00.
The display output of the VG-eps file for the contrast step Cyp1 <http://farbe.li.tu-berlin.de/AEX8/AEX8-0IN.eps> leads not to the intended output. The ISO contrast step is Cyp8.
The display output of the PG-eps file for the contrast step Cyp1 <http://farbe.li.tu-berlin.de/AEX9/AEX9-0IN.eps> leads not to the intended output. The ISO contrast step is Cyp8.
However, Win AdobeDistiller V3 and Mac GraphicConverter V5.3 produce the intended PDF output of the ISO contrast step Cyp1.
