

Creation of an own profile with the name: LCD_D65_24_2010

Computer operating system *Mac OS Version 10.7.5 of 2010*, created 2020-06-25

Choose the following menu steps:

Apple, system preferences, display, colours, calibration

The last menu shows the following steps:

*1. Introduction, 2. Set up, 3. Native Gamma, 4. Target Gamma
5. Target White Point, 6. Admin, 7. Name, 8. Conclusion.*

Go to Menu: *1. Introduction*. Choose the option *Expert Mode*.

Go to Menu: *4. Target Gamma*. Use the Gamma slider for changes.
Between Gamma=1,0 and 2,6 the contrast changes
from low to high by a slider. Choose the value: 2.4

Go to Menu: *5. Target White Point*. Choose the option *D65*.

Go to Menu: *6. Admin*. Choose the option:
Allow other users to use this calibration.

Go to Menu: *7. Name*. Input the name *LCD_D65_24_2010*.

The profile is stored and can be chosen in the display profile list.
