

logarithmic U_a -data

$$U_a = (P_o \cdot D_o)^{0,5}$$

$$\log U_a = (\log P_o + \log D_o) / 2 \log D_o = -0,35[u_\lambda - u_{538}]$$

$\log [U_a, P_o, D_o]$

$$u_\lambda = (\lambda - 550) / 50$$

$$\log P_o = -0,35[u_\lambda - u_{563}]^2$$

Adaptation: $\lambda_{PD} = 550$
