## Discriminability of 5 step colour series (Yes/No decision) Layout example: three 5 step colour series HP Color Laserjet CP1514n White W

There are three basic colours on each page: 5 steps, 4 differences Black N, White W and Chromatic X. Ten pages include 10 hue planes

Chromatic X X = OYLCVM and RJGB. There are at maximum 12 distinguashable steps. PS test chart  $1 (rgb \rightarrow rgb_d)$ 

5 steps, 4 differences according to DIN 33872-2, file -> PS printer

All steps of the three series N-W, W-X and X-N should be distiguishable on all pages. Are the three 5step series distinguishable on all pages? underline: Yes/No

in case of No: Are the three 5 step series on Page x of 10 pages distiguishable?

Underline Yes/No and give in case of No the number of distinguishable steps? Page 1: Yes/No, if No 11/12 step differences are distinguashable of O = Orange Red

Page 2: Yes/ $\overline{\text{No}}$ , if No 11/12 step differences are distinguashable of Y = Yellow

Page 3: Yes/No, if No .../12 step differences are distinguashable of L = Leaf green Page 4: Yes/No, if No .../12 step differences are distinguashable of C = Cyan blue

Page 5:  $\overline{\text{Yes/No}}$ , if No .../12 step differences are distinguashable of V = Violett blue Page 6: Yes/No, if No .../12 step differences are distinguashable of M = Magenta Red Page 7: Yes/No, if No 11/12 step differences are distinguashable of R = Elementary Red

Page 8: Yes/No, if No  $\frac{11}{12}$  step differences are distinguashable of J = Elementary yellow Page 9:  $\underline{Yes/No}$ , if No .../12 step differences are distinguashable of G = Elemantary Green Page 10: Yes/No, if No ... /12 step differences are distinguashable of B = Elementary blue

Sum: /10 Yes-Pages and/120 step differences are distingishable
