 application for measurement of printer or monitor systems

TUB material: code=rh4ta

Q-function changes; transition from light- to color metrics
 scaling function of **light metrics**:
 $Q[k(x - u)] = Q[k(\log L - \log L_u)]$
 log L → log P for **color metrics**:
 $Q[k(\log P - \log L_u)] = Q[k(\log L - \log L_u + \log P - \log L)]$
 with saturation $p = \log P - \log L$
for color metrics: Q [k(x - u + p)]

NW-achromatic- as well as RG- and JB-chrom. thresholds as function of Y
 experiments and data: BAM-research report no. 115 (1985), page 72
