 application for measurement of printer or monitor systems

TUB material: code=rh4ta

**Q-function changes; transition from light- to color metrics**  
 scaling function of **light metrics**:  
 $Q[k(x - u)] = Q[k(\log L - \log L_u)]$   
**log L → log P for color metrics**:  
 $Q[k(\log P - \log L_u)] = Q[k(\log L - \log L_u + \log P - \log L)]$   
 with saturation  $p = \log P - \log L$   
**for color metrics:  $Q[k(x - u + p)]$**

**NW-achromatic- as well as RG- and JB-chrom. thresholds as function of Y**  
 experiments and data: BAM-research report no. 115 (1985), page 72
