The diagram shows a 3x3 grid of color patches. The top row contains white (NW_100*_e), light gray (NW_75*_e), and light red (R00Y_100_050*_e). The middle row contains cyan (G00B_100_100*_e), medium green (G00B_075_050*_e), medium gray (NW_050*_e), medium red (R00Y_075_050*_e), and magenta (R00Y_100_100*_e). The bottom row contains dark cyan (G00B_050_050*_e), dark gray (NW_025*_e), dark red (R00Y_050_050*_e), and black (NW_000*_e). The patches are labeled with their *rgb**_e values (top) and *HIC**_e values (bottom). The patches are connected by lines forming a grid. The patches are labeled with their *rgb**_e values (top) and *HIC**_e values (bottom). The patches are labeled with their *rgb**_e values (top) and *HIC**_e values (bottom).
