

## Conclusion 31/2007 ISO TC159/SC4/WG2

### *Ergonomics – Visual Display Requirements*

ISO TC159/SC4/WG2 realizes that the colour spaces CIELAB and CIELUV of **CIE Division 1** will soon become ISO/CIE standards. In applications we use these CIE colour spaces and *device-dependent* relative RGB colour spaces. For users of visual display systems a *device-independent* RGB colour space is useful. This produces via software the elementary hues Red, Green and Blue for the RGB data 100, 010 and 001 and equally spaced output in CIE colour spaces for equally spaced RGB input. We recommend that **CIE Division 1** study the colorimetric definition of such a space, which can be used in visual display applications.

*Remark: We have realized that an example colour space of this type is published in CIE X030:2006, p. 139–144.*

*Note: For this table text compare the content on page 2 of the document CIE R1-47, see <http://files.cie.co.at/526.pdf>*
