

Example of negative film with standard exposure according to ISO/IEC 15775/ed-2:2022.

The luminance of any pixel is in the *rgb*-16bit range.

The contrast between white and black is in the *rgb*\*-8bit range.

Output linearisation produces the equally spaced *rgb*\* data.

For 4 resolutions 192x128 up to 1536x1024, see <http://color.li.tu-berlin.de/AEC7/AEC7L0NP.PDF>
