

# TUB colourimetry with normalization to $Y=90$ , $C=Y_W : Y_N = 25 : 1$

Equations for Cyan (C), Rot (R), White (W), Grey (U), Black (N):

Tristimulus value

$$Y_C + Y_R = 48 + 42 = 90 \quad [1]$$

Ostwald and antagonistic (a) colour

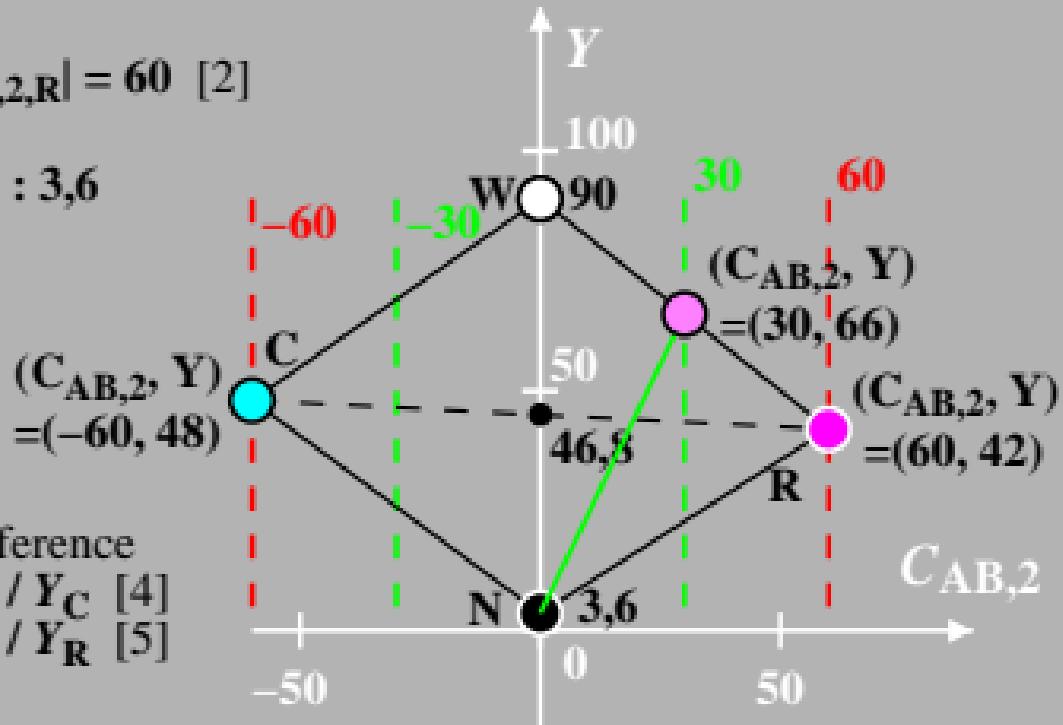

$$Y_0 + Y_a = (47+X) + (47-X) = 90 \quad [1a]$$

Chromatic value

$$|C_{AB,2,C}| = |C_{AB,2,R}| = 60 \quad [2]$$

Contrast

$$\begin{aligned} C = Y_W : Y_N &= 90 : 3,6 \\ &= 25 : 1 \quad [3] \end{aligned}$$

Chromaticity difference

$$c_{AB,2,C} = C_{AB,2,C} / Y_C \quad [4]$$

$$c_{AB,2,R} = C_{AB,2,R} / Y_R \quad [5]$$
