

At the CIE meeting in South Africa, June 2011, *CIE Division 1* decided to establish the Reportership **CIE R1–57 Border between Luminous and Blackish Colours** by *Thorstein Seim (Norway)* in response to the resolution 18/2009 of ISO/IEC JTC1/SC28.

In addition *CIE Division 8* decided to establish the Reportership **CIE R8–09 Output Linearization Methods for Displays and Printers** by *Klaus Richter (Germany)* in response to the same resolution 18/2009 of ISO/IEC JTC1/SC28.

Both reports **CIE R1–57** and **CIE R8–09** have relations and may appear during 2013 at the CIE web site.

Possible Result: Definition of a *device-independent visual RGB^*_e* system as response to the request of SC28. All surface colours define a hue circle of maximum chroma located within the CIE (x,y) chromaticity diagram. CIELAB chroma C^*_{ab} and lightness L^* of this circle as function of hue h_{ab} serves as reference points of a *device-independent visual RGB^*_e system* (compare the reference C^*_{ab} , L^* hue circle of the *NCS* system).
