

PostScript programing of a layout with CIELAB colors

programing -> color storage -> color printer output
 in PostScript Level 2 printer/computer color monitor output

PSL2-program with CIELAB-
 data for three color areas:
 mean gray and two equal
 light different chromatic red

gray: $L^* = 50, a^* = 0, b^* = 0$
 red 1: $L^* = 50, a^* = 20, b^* = 0$
 red 2: $L^* = 50, a^* = 40, b^* = 0$

red 1: $L^* = 50, a^* = 20, b^* = 0$
 red 2: $L^* = 50, a^* = 40, b^* = 0$
 gray: $L^* = 50, a^* = 0, b^* = 0$
