### Line-element examples for grey samples (0,2≤x≤5)

***F(x)*** is called the line-element function of ***f(x)***.

$$\frac{d[F(x)]}{dx} = f(x) \quad [1]$$

$$F(x) = \int \frac{f'(x)}{f(x)}\, dx \quad [2]$$

Example for the normalized tristimulus value $x=Y/Y_u$:
